

**INSECTS E-HONOR**  
Southern New England Conference  
Presented by: Area Coordinator Herminio Guevara  
Friday, April 24, 2020

Name: \_\_\_\_\_

1. Do one of the following:
  - a. Mount or photograph a collection of 20 species of insects representing at least six different orders. (No moths or butterflies and no carelessly mounted or broken specimens will be acceptable.)
    1. Place under each specimen a label showing the collector's name, date caught, locality where caught. Labels should not be larger than 1/4 x 3/4 inch. (6 mm x 20 mm).
    2. Identify insects down to genus or species level on a second label to be mounted below the first, including source authority.
    3. Arrange all specimens neatly in an insect box according to orders and families. Order labels should be pinned to the box rather than attached to the individual insect pins. Common names are valueless.
  2. Make colored drawings or paintings of 20 species of insects, representing at least six different orders. Drawings or paintings need to be life size or larger, to show the details of small insects, and in natural coloring. Label the drawings with common names and genus or species level names.
  3. Take color photographs of 20 species of insects, representing at least six different orders. All pictures should be in focus, close-ups and properly labeled, showing where photographed, the date photographed, common names and genus or species level names.

4. What are the distinguishing characteristics of an insect?

5. Name five species of useful insects.

6. Name five species of injurious insects, and tell how to control them.

7. Tell two Bible stories in which insects played an important role.
